The Tellusant Vision

TELLUSANT
Streamlining Corporate Decision Making

WE KNOW OF A DAY NOT TOO
FAR OFF WHEN

- **Corporate planning happens quickly and smoothly** augmented by decision support platforms

- **Information and models are democratized** for all relevant people to access without gate keepers

- **The language of management is standardized** around the world so that executives mean the same thing on the same topics

WE KNOW THAT ON THIS DAY

- **Precision is increased five- to tenfold** in decision making, leading to better resource allocation and reduced waste

- **Time required to deliver plans is cut by three quarters**, thereby allowing for continuous updates

- **Planning productivity is more than doubled** with a corresponding cost reduction

WE KNOW THAT ON THIS BRIGHT DAY

- **Plans are codified on decision platforms** and accessed through web apps with APIs as the glue to all systems

- **Knowledge is captured in standardized structures,** be it quantitative or qualitative

- **The world shrinks** and collaboration is as easy globally as it is in the local conference room

This will be the day when companies reach their destination.
